Deal Alon,

It is with a great pleasure and satisfaction that I write to you to inform that the series of treatments I had in your clinic were of an outstanding relief for me. I had suffered both in the elbow and in the upper part of my leg for months and none of my Swiss doctors, or medical experts, could really find a remedy. You did it and your dedication to sort out these pains was successful and very rewarding for me.

You have also helped me become acquainted with the acupuncture technique which I never tried beforehand. This approach to healing has now become a new way for me to treat pains and the natural course to pursue.

I am also very grateful to you for treating my friend, Kurt, who on a business trip to Israel suffered from strong back pains. Kurt had to interrupt business meetings and called you late at night asking for some help. You were so kind and helpful to invite him to your Clinique for treatment and he became sincerely appreciative of your extraordinary professional care.

Yours,

Boaz Barack
